

A close-up photograph of several walnuts on a burlap surface. Some walnuts are whole, while others are cracked open, revealing the light-colored, textured nutmeat. The lighting is warm, highlighting the natural textures of the shells and the burlap.

POWER NUTS

Ukrainian walnut producer

**UKRAINIAN
PRODUCER & EXPORTER**

PowerNuts

About the Company

Power Nuts Group is international producer and exporter of walnuts from Ukraine.

Today, our leading business marketplaces located in Europe and CIS, and we are continually expanding the territory. The range of countries we operate in is the strength of our business.

We have a full walnut processing cycle with a capacity of 1500 MT/year. The process starts with clearing the kernel from dust and membranes, sorts into fractions and types by color on a photo separator, dry in a drying chamber, and packing. The presence of industrial refrigerators allows you to work during the year.

Production

Power Nuts Group is **international producer** and exporter of walnuts kernel with a **capacity 1500 MT/year**. We combine our unique quality with proactive approach to the Customer needs.
